<tr>
<th>Top 10 Things You Can Do to Protect Endangered Plants</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Visit botanical gardens, arboreta, wildlife refuges, and other locations to learn about endangered plants.</td>
</tr>
<tr>
<td>2. Plant native plants, which are key to maintaining our natural ecosystems.</td>
</tr>
<tr>
<td>3. Never harvest threatened or endangered plants. It is illegal to harm any endangered plants live in the wild.</td>
</tr>
<tr>
<td>4. Buy plants from reputable buyers. Plant collectors must be particularly careful to ensure unusual plants are legal.</td>
</tr>
<tr>
<td>5. Don’t plant invasive plants, which can wreak havoc on native ecosystems and endangered plants and animals.</td>
</tr>
<tr>
<td>6. Minimize use of herbicides and pesticides, which are hazardous pollutants that affect wildlife at many levels.</td>
</tr>
<tr>
<td>7. Buy reused wood or Forest Stewardship Council certified wood, highly recycled paper, and fair-trade coffee.</td>
</tr>
<tr>
<td>8. Don’t drain! Some of the most precious habitats in the country are wetlands with unique plants and animals.</td>
</tr>
<tr>
<td>9. When choosing a first or second home, look for houses that are already built.</td>
</tr>
<tr>
<td>10. Don’t destroy habitat. Protecting habitat saves entire communities of animals and plants.</td>
</tr>
