

The American Alligator

Hi, My name is Aaron the American Alligator. And here's a fun fact about me. We alligators once faced extinction. The United States Fish and Wildlife Service put us on the endangered species list in 1967. Luckily we got legal protection. Now we American alligators have been taken off the list.

Me and my family's habitats include rivers, lakes, ponds, swamps and bayous. And you can most likely find me in Texas, Florida and Louisiana. No animals hunt me because I am big and scary and I can eat you! Well my prey are fish and shrimps because there is not much to eat where I live. So we can grow to 10 to 15 feet and we weigh half a ton 1000 pounds. That's a lot! But our average guys weighs between 500 and 600 pounds.

Altogether, thank you for reading my story. Please help me, my family and friends. There's not many of us left and I know Endangered .org is trying to help us please help us.
