The Life Of A Panda!

Giant pandas are in **grave** danger! So today I am going to tell you facts about giant pandas. First, when a panda is young it only weighs 5 ounces and it is blind and **lame**. Next, when a panda is young it is not **fearsome** so the mother will take care of the panda. Now, as a panda grows its fur is black and white so it will camouflage well. Also, a panda eats a lot of bamboo and it sleeps a lot fun fact did you know that the giant panda sleeps for 2-4 hours? You might wonder why giant pandas are endangered because people cut down trees so their homes are fewer also because of **climate** change bamboo is less. A panda gets the **privilege** to leave at 4 years old. Even, **amateur** and professional photographers can't get a photo of a giant panda because it is so **rare** there are only 1,684 pandas left on Earth! Giant pandas are **precious** and I hope you learned something about giant pandas.
